## Detailed Description of Services

**Social Security Trace** uses the volunteer provided Social Security Number to identify alias and maiden names and prior addresses used by the volunteer.

The **50 State DOJ "Dru Sjodin" Registered Sex Offender** checks the Federal Department of Justice database which includes the listing of registered sex offenders for all 50 States – except Nevada, which currently has an injunction in place.

The **Government Watch List Search** identifies individuals and companies, owned, controlled by, or acting on behalf of countries targeted by US foreign policy as terrorists and narcotics traffickers. These individuals are identified as Specially Designated Nationals ("SDN"). The SDN search is conducted using documentation provided by the US Treasury's Office of Foreign Assets Control ("OFAC").

The **Advanced Criminal Record Locator Search (L2)** first automatically looks for criminal records in the volunteer's current county of residence jurisdiction. Then it checks a nationwide criminal database of over 350 million records to identify any further records in places the volunteer has lived and/or visited. All reported criminal history is compliantly validated at the primary source of information (county/state courthouses).

The **Complete Criminal Record Locator Search (L3)** uses a combination of three distinct search methods to find any criminal records and leave no stone unturned. The Complete Criminal Locator first looks for any criminal records in all county and state jurisdictions of the volunteer's last 7 years of address history. Then it checks both a nationwide criminal database of over 350 million records and a proprietary nationwide arrest record database to identify any further records in places the volunteer has lived and/or visited. The Complete Criminal Record Locator Search searches alias and maiden names across all criminal locators in addition to the volunteer's primary name. All reported criminal history is compliantly validated at the primary source of information (county/state courthouses).

A **Motor Vehicle Record Check** contains state driving record information dating back at least 3 years, and possibly further back, depending on the jurisdiction. The information found consists of the current status of license as well as any history of speeding, reckless driving, careless driving, driving under the influence, driving while intoxicated, etc. The dates of all incidents are found in these abstracts along with all suspensions with dates and causes of said suspensions.

A **Consumer Credit Check** provides a credit report that reflects current and previous negative account information, collections, liens, and other applicable information.

A **Reference Interview** is an interview of an acquaintance or work related individual to aid in determining a volunteer's traits or character.
